Introduction

The Advance Mega Menu app provides the feature of Mega Menu. It implies that we can define a simple menu as a mega menu in which we can show multiple categories in a single menu. For the website's front end, we have made a mega menu that obtains the category details from the back end and displays it as described in the mega menu configurations. (i.e., 2 columns menu, 3 columns menu, 4 columns menu, background color or image, main menu icon, product slider, slider position, and footer for mega menu).

The Advance Mega Menu app also allows the admin to opt from Category Mega Menu, Pages & Category Megamenu, List Category Megamenu, Pages Megamenu Pro Max, Pages Megamenu Pro, and Pages Megamenu.

Benefits of Advance Mega Menu

- Easy customization of Mega Menu.
- Easy & effective management of Product Display.
- Admin can rename the category list as per the requirement.
- Admin can select a number of columns for the menu dropdown.
- Admin can set images for highly recommended products and relevant categories.
- Admin can set icons, background color, etc. for menus.
- Admin can create multiple categories and their subcategories as well.
- Get different types of Mega Menus including, Category Mega Menu, Pages & Category Megamenu, List Category Megamenu, Pages Megamenu Pro Max, Pages Megamenu Pro, and Pages Megamenu.

Prerequisites

The following points must be followed before starting the plug-in installation:

- One should log in as an Admin in Odoo.
- Check that your Odoo Instance is compatible with Advance Mega Menu.
- An e-commerce module should be present in your instance to use this app.

Note: The current version includes new features and UI upgrades that may not be available in older versions.

Installation

Installation Steps

Step 1: Download and extract the Zip File.

Step 2: Check your Odoo add-ons path.

- It should be same as defined in the Odoo Config file.
- Config files are mostly saved in /etc folder. For e.g. /etc/odoo.conf
- Open Config file:
    - Give the command: sudo/etc/odoo.conf
    - Config file content: addons_path = /opt/odoo/addons

Step 3: Open Terminal and go to the download location

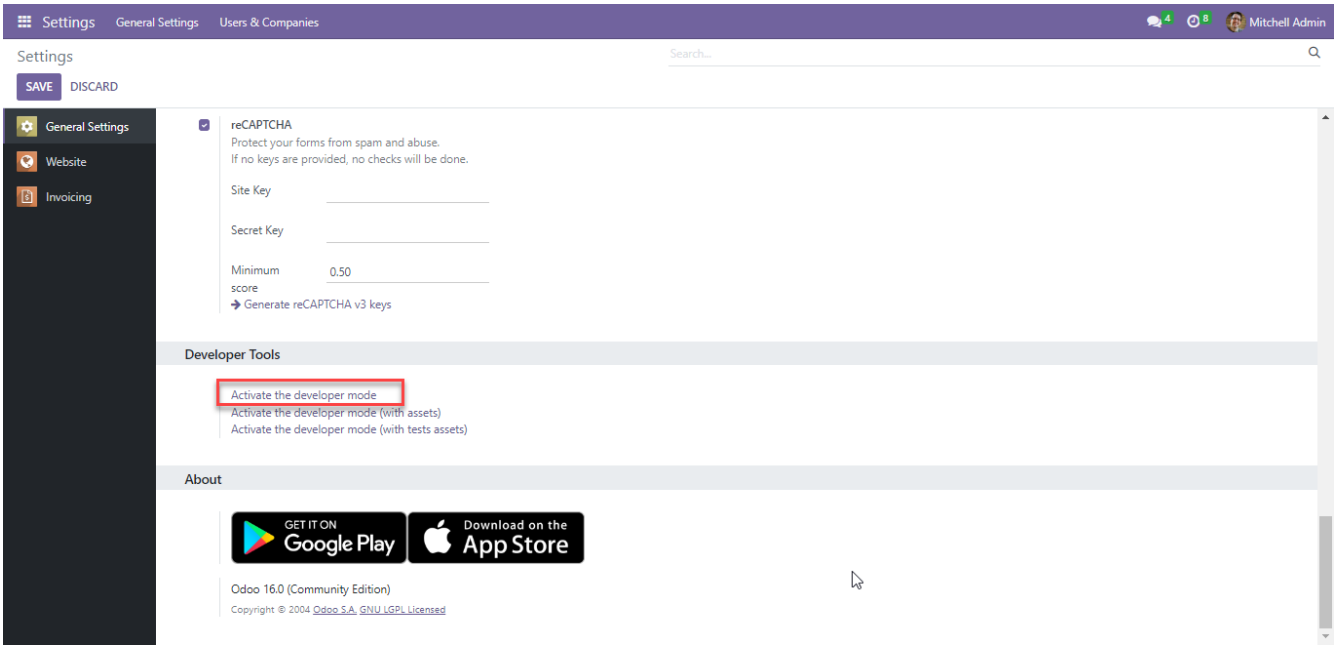

- For e.g., if the download location path is: /home/odoo/Downloads then the command to be written in the terminal would be: cd/home/odoo/Downloads

Step 4: Copy download modules to the add-ons path

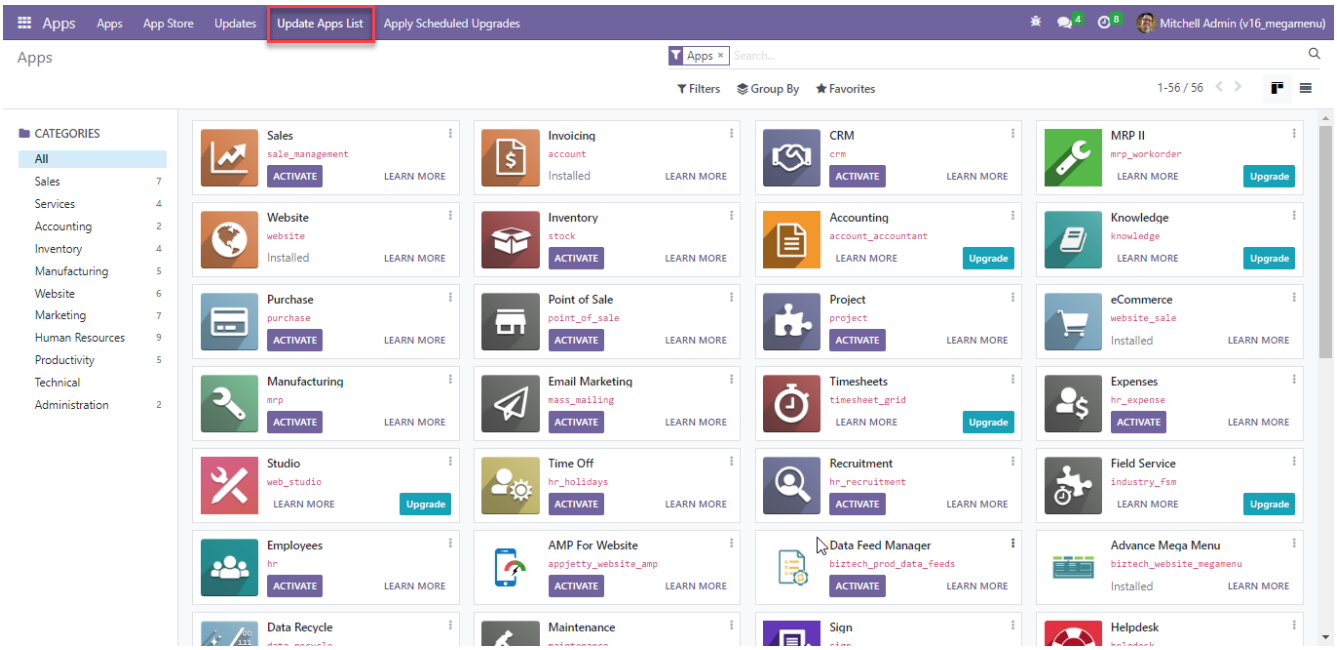

- Give the commands mentioned below to perform copy operation:
    - $cd /home/odoo/Downloads/biztech_website_megamenu
    - $cd v18
    - $sudo cp biztech_website_megamenu /opt/odoo/addons

Step 5: Restart the Odoo server

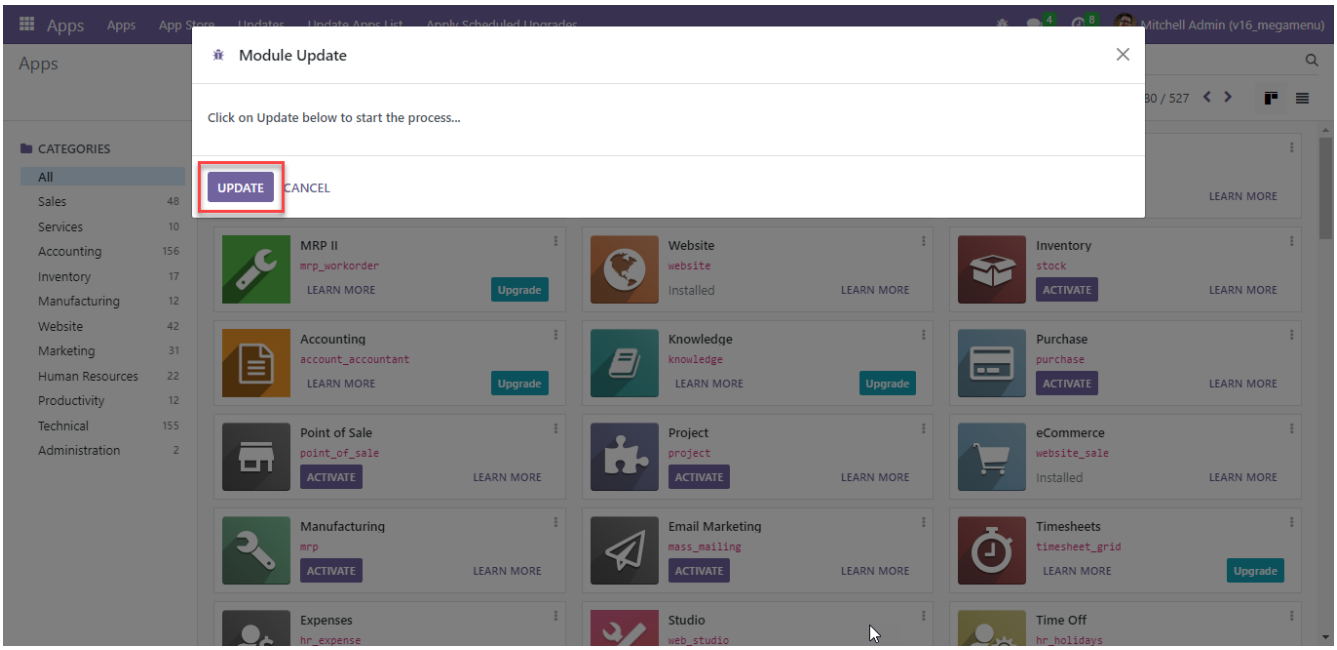

Step 6: Log in with the admin credentials in your Odoo instance. And then the admin needs to activate the developer mode by clicking on the settings and then clicking on the Activate the developer mode.

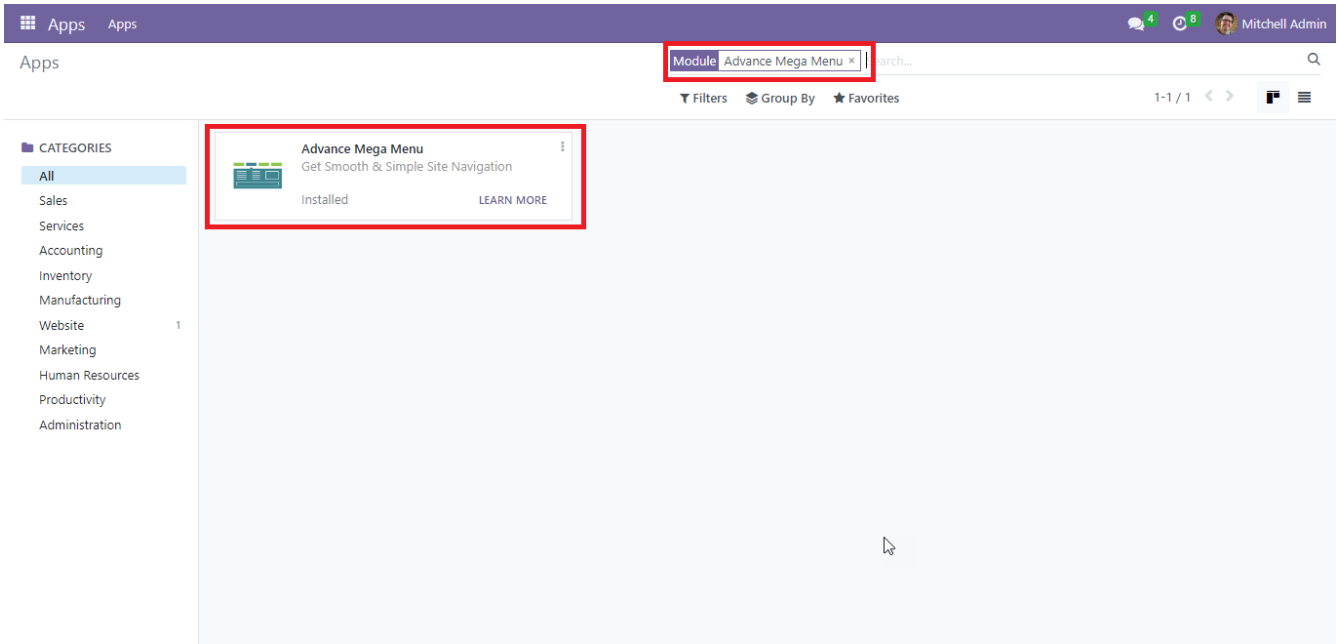

Step 7: Go to Settings -> Apps -> Update Apps List

Step 8: Click on Update button.

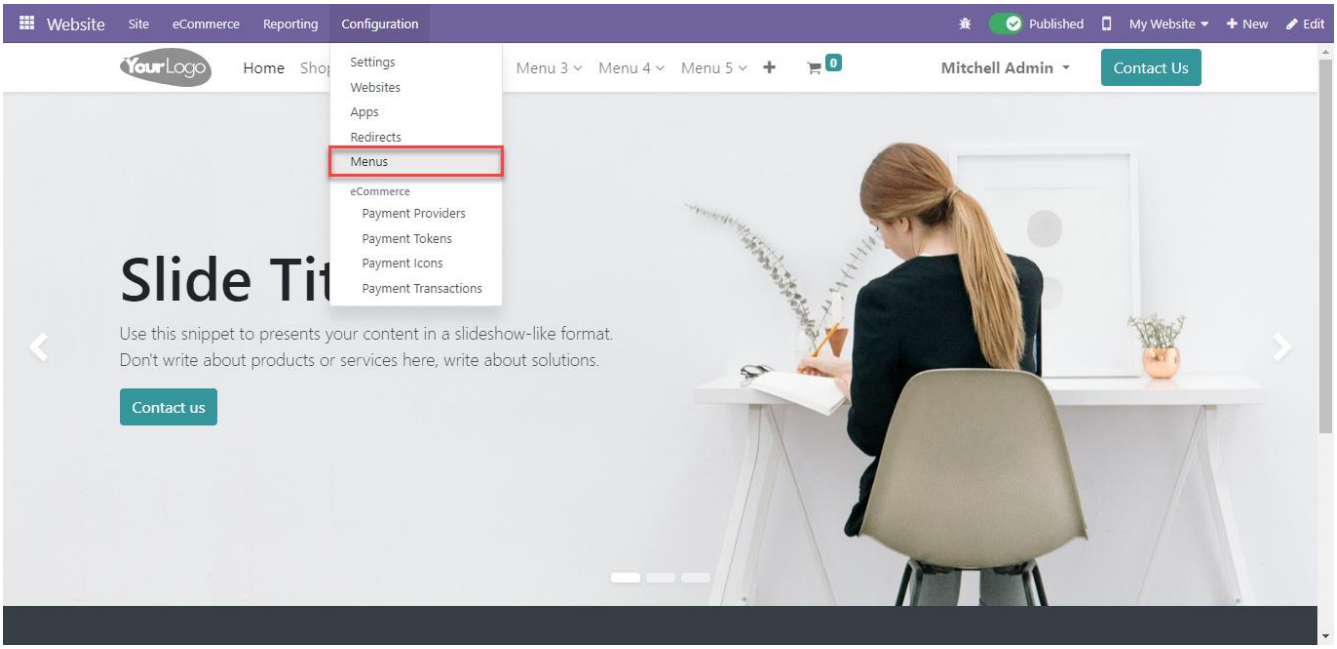

- Enter module name in the search box provided in the top right corner of the page. For e.g. Here write Advance Mega Menu. Click on the **'Install'** button.

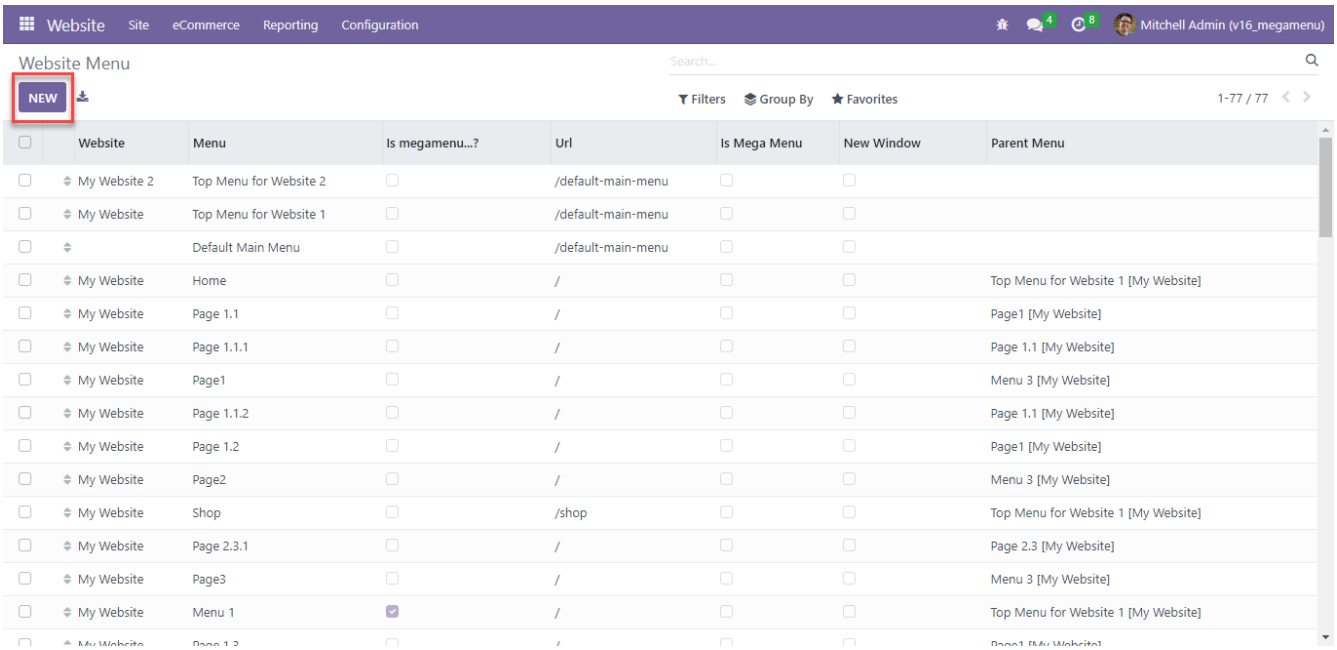

App Configuration

Creating Mega Menu:

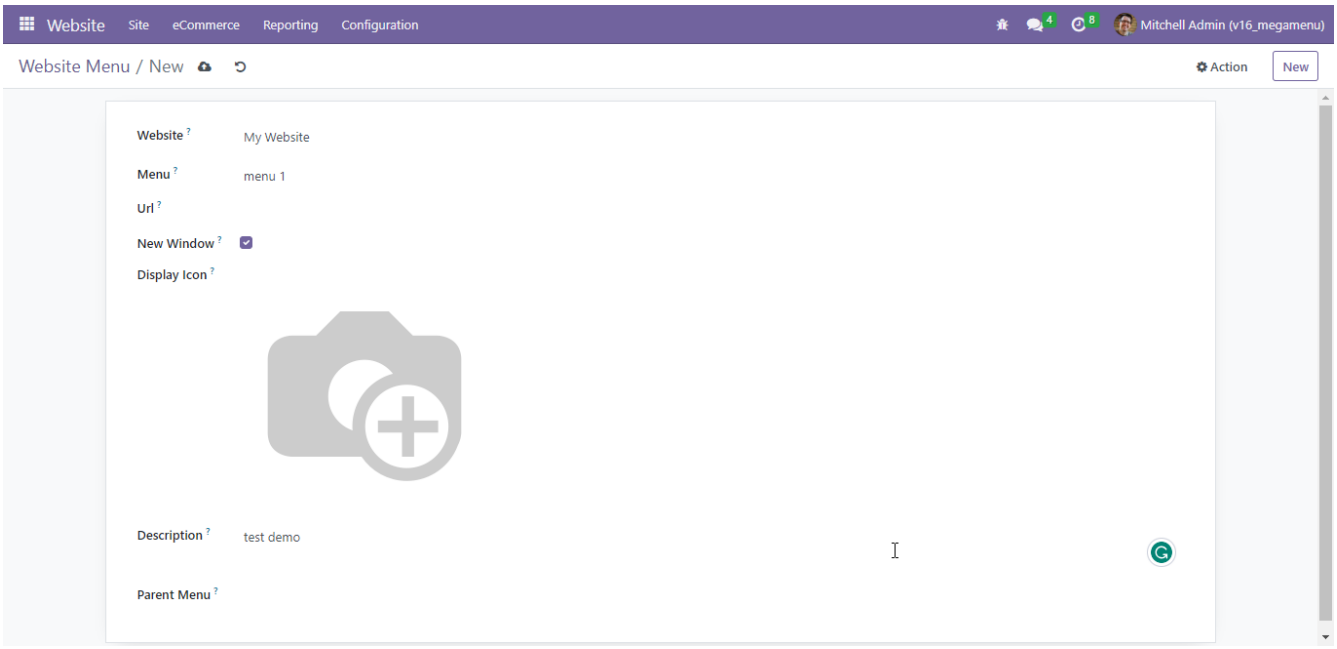

- To see the menus the user needs to click on the **Menu -> Website -> Configuration -> Menus.**

- By clicking on the menus tab the user will be redirected to the website menu page where the user will be able to see the existing menus. And if the user wants to create a new menu so the user needs to click on the New button.

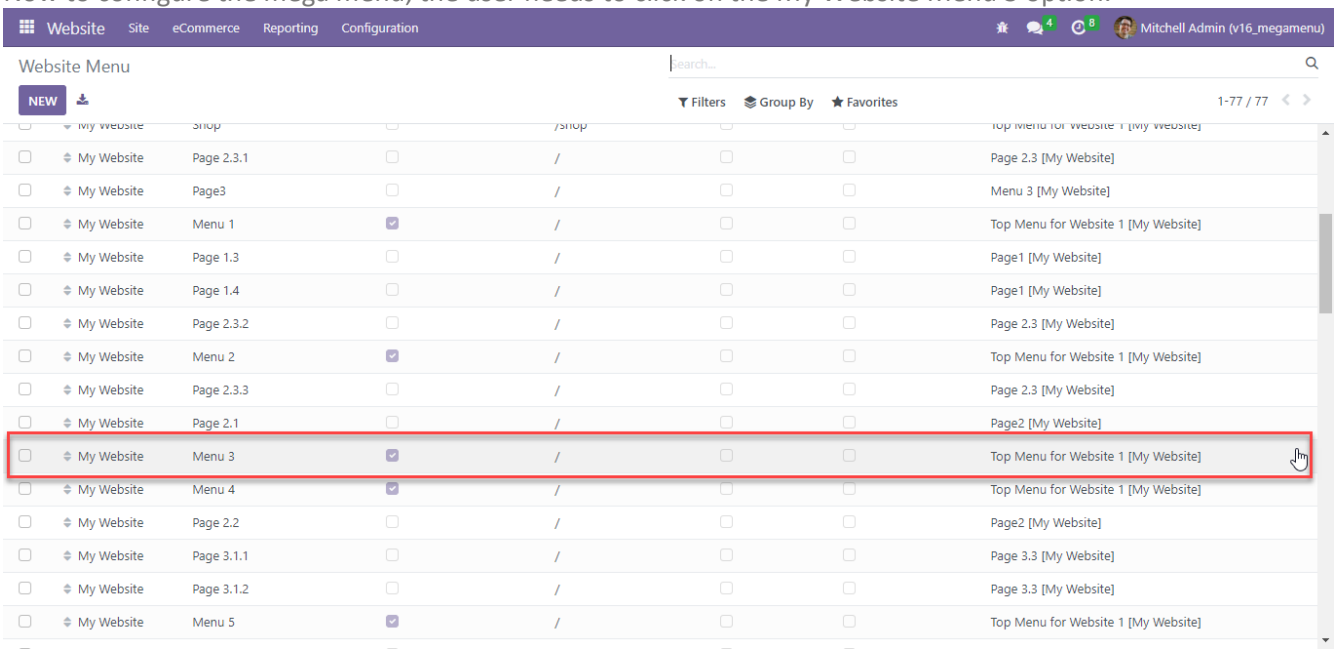

- By clicking on the new button, the user will be redirected to the New page, and on that page, the user needs to add the information which is seen in the below screenshot.
